

## CASE STUDY

|                  |   |
|------------------|---|
| Contract:        | Holly Hill Leisure Centre   |
| Main Contractor: | Balfour Beatty  |
| Value:           | £2M   |
| Category:        | Public Commercial   |
| Works:           | The works here consisted of building a leisure centre, complete with learner and main swimming pools plus associated car parks and external works. The works began in the summer of 2015 and it wasn't long before we were battling with a wet winter and trying to dig out and prepare a basement along with two swimming pools. |

The external works provided their own challenges with an elevated section of pathway to the rear of the project constructed from selected excavated site material using a tensor earth retention system. We also produced two balancing ponds behind the service yard for the storm water system with a run-off excavated by hand through the woods to the north of the site.
